

## ABSTRACT

A system and method for facilitating real time transactions between a user and multiple entities are described. In the system, an exchange of information related to a transaction involving a user and multiple entities is facilitated.

1. A system for facilitating real time transactions between a user and multiple entities, the system comprising:  
a. a user interface for receiving a request from a user to initiate a transaction;  
b. a database for storing information related to the transaction;  
c. a processor for processing the request and for facilitating the transaction;  
d. a network for communicating with the user interface and the database;  
e. a server for facilitating the transaction;  
f. a plurality of entities for participating in the transaction;  
g. a plurality of users for participating in the transaction;  
h. a plurality of transactions for being facilitated by the system;  
i. a plurality of real time transactions for being facilitated by the system;  
j. a plurality of real time transactions for being facilitated by the system;  
k. a plurality of real time transactions for being facilitated by the system;  
l. a plurality of real time transactions for being facilitated by the system;  
m. a plurality of real time transactions for being facilitated by the system;  
n. a plurality of real time transactions for being facilitated by the system;  
o. a plurality of real time transactions for being facilitated by the system;  
p. a plurality of real time transactions for being facilitated by the system;  
q. a plurality of real time transactions for being facilitated by the system;  
r. a plurality of real time transactions for being facilitated by the system;  
s. a plurality of real time transactions for being facilitated by the system;  
t. a plurality of real time transactions for being facilitated by the system;  
u. a plurality of real time transactions for being facilitated by the system;  
v. a plurality of real time transactions for being facilitated by the system;  
w. a plurality of real time transactions for being facilitated by the system;  
x. a plurality of real time transactions for being facilitated by the system;  
y. a plurality of real time transactions for being facilitated by the system;  
z. a plurality of real time transactions for being facilitated by the system;
